EDUCATION

IS THE FIRST STEP IN PREVENTION.

One of the most important things we can do to protect children is to talk with them about potentially dangerous situations.

The

Touch

It can be good, bad or confusing.

Safe

No!

Children can say NO! to touches they don't like.

Place

Educating elementary, middle and high school students in the Midlands with programs like: Gender Stereotypes, Effective Communication and boundary setting. Adults programs are available concerning: Internet Safety 101, Child Safety Training, Sexual Harassment of the Workplace, and the Impact of Sexual Assault on the Family.

REDUCE THE RISK

Here are some suggestions to help you reduce your risk of being assaulted.

Be in charge of your own life. Don't put yourself in a situation where you have to rely on others to take care of you. When on a date, don't feel as though you "owe" that person anything.

If You Love Me...

Your partner should respect your feelings and wait until you're ready.

Communicate

Think about what you really want before you get into a sexual encounter. Be clear. Don't just hear the words; sense the signals. If you're getting mixed messages, stop.

Don't mix sexual decisions with drugs and alcohol. Your ability to make smart decisions is hampered when you're impaired.

90% of acquaintance rape involve alcohol.
